Summer appears to have finally arrived after the recent wet weather allowing everyone to enjoy being in their gardens at long last! With the growing season well underway now - our expanding gardening team have been very busy cutting rapidly growing grass, keeping on top of weeds and tending shrubs & plants so that everywhere is looking at its best.

With this in mind, please might we ask all pet owners to clear up after their animals - the teams would be very grateful.

Chelsea Flower show 2016 has inspired a lot of customers to think about new features and changes in the garden, so please do contact us to discuss and implement your ideas however simple or grand they might be.

Chestnut Coppice

Throughout the Spring we have been processing winter cut Chestnut in our coppice. We have made and supplied a range of fencing products for many projects both private and commercial, including some large woodland conservation sites that prefer to use traditional materials for their fencing needs.

Our newly acquired Unimog has made short work of the product extraction from the woodland.

Rustic Chestnut poles have been supplied (in a range of diameters & lengths) for other non fencing projects to create for example, some interesting garden structures & substantial raised vegetable beds.

Even our less straight poles were ordered for bespoke restaurant & bar furniture and a couple of our posts now support a "tree house" in a child's bedroom!

2016

We are delighted to welcome many new customers this year with all the exciting new projects ahead. It is with great pleasure that we continue to provide our range of services to families and businesses that have used our company for many years.

Hopefully you will have discovered our new website and found it to be of interest.
